Your Solution for National Exchange

Expand your current KONZA membership to connect to the Trusted Exchange Framework and Common Agreement (TEFCASM):

- The 21st Century Cures Act called on the ONC to create and support a Trusted Exchange Framework and Common Agreement (TEFCA).
- This created a common set of technical and legal requirements to simplify and enable nationwide exchange of healthcare data.
- A central component of TEFCA is operationalizing Qualified Health Information Networks™, or QHINs, to serve as centralized exchange partners in a network-of-networks approach.

The Value of Joining the **KONZA QHIN**
